

Food Waste Categories

Gameplay

Wasteless

Description

Food waste on the cards should be classified into the 3 following categories: avoidable food waste, non-avoidable food waste and potentially avoidable food waste. One table belongs to each category.

Players have to place the cards (belonging to the given category) on the question marks. Every food can be categorized in one category.

18 cards (6 pcs avoidable, 6 pcs non-avoidable, 6 pcs potentially avoidable food waste) belong to the game. At the beginning of the game, 4-4-4 shuffled cards must be given to the player at the same time, which should be placed on appropriate table.
